

# CRAFT CHALLENGE

## Get creative! Make your very own Zoo at home.

Use whatever building materials you like. You could even include some features of your favourite animals at Wellington Zoo.

Here are a few suggestions to get you started:

### Spider Monkey

Spider Monkeys have an amazing prehensile tail they can use like a fifth hand!

### Sun Bear

Named for the golden rising sun on their chest, just like Sasa at Wellington Zoo.

### Chimpanzee

Humans share ~96% of our DNA with Chimps! We think Kitwe got all the playfulness genes.

Tick ✓ the circles when you've made your creation

### Giraffe

Did you know, a group of Giraffes is called a tower!

### Kororā (Little Blue Penguin)

Kororā are the smallest species of Penguin in the world, and the most adorable.

### Savannah

We're going to need somewhere for our herds of African animals to live.

### Tiger

Those stripes aren't just for fashion, they help Tigers camouflage in their jungle homes!

### Primate Habitat

Make sure to include some trees for your primates to play on.

WELLINGTON

ZOO

# CRAFT CHALLENGE

WELLINGTON

ZOO

## Tuatara

Even though they look like lizards, they're an ancient reptile from the dinosaur age!

## Scheltopusik

(Shell-toe-pyou-sick)

Don't worry it's not a snake, just a legless lizard.

## Lion

While Wellington Zoo has two female Lionesses, don't forget that super impressive mane on the males!

## Kiwi

Kiwi are the world's smallest ratite species, much smaller than Emus and Ostrich.

## Wētā

Make sure to include some trees if you're making a Wellington Tree Wētā.

## Terrarium

What kind of habitat do reptiles and invertebrates live in?

## Ostrich

Just like the Kiwi, an Ostrich is flightless! But don't worry, those long legs make it a world class sprinter.

## Tarantula

Remember: spiders have 8 legs, not 6; this makes them arachnids, not insects.

## Kunekune

Even though they're not native to NZ, we love our Kunekune pigs. Even Atanga with his big tusks!

**Have you completed the craft challenge?**

We'd love to see your zoo creations! Send your photos to [learning@wellingtonzoo.com](mailto:learning@wellingtonzoo.com)
